1.0 Introduction

- 1.1 Dynamic Design Consultants Ltd. (DDC) have been commissioned as Mechanical & Electrical Consultants to provide design guidance for typical Mechanical & Electrical system requirements.

2.0 Telecommunications

2.1 Infrastructure

An internet service provider has not been chosen by the developer at this stage in the project, However, contact has been made with services providers to attain infrastructure connection proposals, with service routes and space requirements. It is assured that this development will be provided with appropriate broadband infrastructure by the chosen service provider. The chosen providers proposal will be further progressed in conjunction with the formal telecommunications application pending receipt of a planning reference number.

3.0 Electrical

3.1 Infrastructure

ESB have been engaged and have been consulted on the proposed electrical requirements of this development. The ESB cable routes & substation locations have been coordinated with ESB & are in line with ESB developers guides & technical requirements. These proposal will be further progressed in conjunction with the formal ESB application pending receipt of a planning reference number.
